# Foreword

Finally we embark on a new season. And here we proudly present our latest catalogue for MX and Street gear. We are sure you will find a lot of great products that will increase your daily business. Duells product teams spend much time on finding new trends and products for our markets, so please enjoy. As we all know we live in a fast-changing world so please use our web [Duell.eu](http://Duell.eu) for all the latest information.

Our aim is still the same as 35 years ago; we are a distributor at heart and we continue to look for a sustainable business in all senses and become a trustworthy, reliable partner and supplier for you and your business. One good example here is the last few years fast growth in e-commerce where we at Duell offer you as our valued dealer great tools to becoming a successful e-trader too.

**Let's make this coming season a great one!**

Best Regards  
Team Duell

# AVIATOR 3

## Raise the bar

Leave everyone behind. Again. Winning once is not difficult, continuing to do so is.

Aviator 3 raises the bar of the competition and redefines the standards of an offroad helmet. The outer shell, exclusively dedicated to the Primal graphic version is 3K Carbon-made. For all the other graphics emphasis is given to the noble Fiber Composite.

For all the range the shell is available in 4 different sizes, and was designed using the wind tunnel to best engineer both shapes and performances. Great attention was concentrated into aerodynamics, to make the helmet stable also at high speed, and the thermodynamics, to optimise thermoregulation.

Airohs technological achievement is condensed in this new product, where the second-generation AMS2 (Airoh Multiaction Safety System), AEFR (Airoh Emergency Fast Release) and AMLS (Airoh Magnetic Lining System) systems are combined.

The 6 air vents and the spoilers with integrated extractors give Aviator 3 a comfortable fit also when used in the most extreme conditions, just as the innovative AHS (Airoh Hydration System) integrated in the EPS.

Aviator 3. Limitless.

### INSIDE THE BOX

- Go Pro support
- Side Bumper
- Extended peak
- Short nose cover
- Screw and filter set
- Top vent covers
- Front covers
- Badge and key
- Helmet bag

**MATERIAL:** Full Carbon 3K

**WEIGHT:** From 1290 g ±50 g (only for Primal graphic)

**4 shells:** 1° XS - S, 2° M, 3° L, 4° XL - XXL

**AVAILABLE SIZES:** XS (53-54 cm), S (55-56 cm), M (57-58 cm), L (59-60 cm), XL (61-62 cm), XXL (63 cm)

**RETENTION SYSTEM:** Dd ring

**VENTILATION:** Front vents, top vents, chin guard vents, rear extractors

**INNER LINING:** Removable and washable inner lining

## Strycker **New!**

**MATERIAL:** HPC (High performance composite)

**WEIGHT:** From 1310 g ±50 g

**3 shells:** 1° XS - S, 2° M, 3° L-XL-XXL

**AVAILABLE SIZES:** XS (53-54 cm), S (55-56 cm), M (57-58 cm), L (59-60 cm), XL (61-62 cm), XXL (63 cm)

**RETENTION SYSTEM:** Dd ring

**VENTILATION:** Front vents, chin guard vents, rear extractors

**INNER LINING:** Removable and washable inner lining

Takes no prisoners the new offroad Airoh helmet. The HPC outer shell comes out in 3 sizes to ensure the best fit possible, emphasized by the anallergic, breathable and fully removable inner-lining equipped with AEFR (Airoh Emergency Fast Release).

Any compromise in terms of safety for Strycker, provided with the revolutionary AMS2 (Airoh Multiaction Safety System), that allows the reduction of the energy amount in case of angular impact.

Highest accuracy in the ventilation, with 5 air vents and 2 rear extractors which perfectly match with a wind-shaped shell.

# Twist 2.0

It seemed impossible, but we were able to improve a best seller. Now the Twist 2.0 is more performing and more aggressive while remaining incredibly light. The shell made of HRT (High Resistant Thermoplastic) boasts a good 2 EPS to ensure the best fitting, and now features a rear spoiler that improves the aerodynamics, making Twist 2.0 amazingly stable also at high speeds.

An impressive upgrade is internally concealed and it's named ASN System (Airoh Sliding Net); this technical improvement allows the lining to flow under impact and provides also an outstanding ventilation.

The adjustable peak has an extension, a sophisticated airflow channelling system, a dust filter and DD-Rings retention system to create the perfect mix underlying your success. Rotation technology.

**Material:** Thermoplastic HRT

**Ventilation:** Front and chin guard vent, rear spoiler

**Retention:** Dd ring

Removable and washable inner lining

**Sizes:** XS 53/54 to XXL 63

**Weight:** 1220g +/- 50g

**Accessories:** Extended peak

## Terminator Open Vision

Terminator OV (Open Vision) sets the standard. A HPC (High Performance Composite) helmet for off road specialists looking for a product with the most important qualities: resistance, light weight and ventilation. Terminator OV offers one of the widest visuals in the category to accommodate state-of-the-art goggles.

Its arsenal includes a complex ventilation system, an outer shell in 2 different sizes, an extended peak, the DD-Rings retention system, dust filters and removable and washable inner-lining.

**Weight:** 1070g +/- 50g

## Alpinestars S-M5 **New!**

Lightweight outer shell is constructed from a technologically advanced impact resistant thermoplastic in two sizes. Multiple density inner liner. Visor attached to helmet with patented system that will allow easy release in case of a crash. Adjustable top pad height (Alpinestars patented A-head system.) Weight 1260g. Comfort liner sliding on low friction surface attached via two elastic connectors anchored at back and front.

- Side shell couple with soft EPS foam prevents damage to collarbone in the event of a crash.
- Emergency release system and removable cheek pads permit the safe and easy removal of the cheek pads while the helmet is still on, while the 3D contoured foam ensures rider comfort..
- Hydration tube channels are integrated into the helmet's cheek pads for convenience and performance.
- Soft textile chin strap is 26mm and is wider than certification requirements for optimal safety and rider comfort.
- Stainless steel D-rings to ensure a tight and secure fit.
- Weight on Medium 1260g

## 350 SERIES

Blending high end materials with cutting edge design, the SCOTT 350 Evo Plus Track Helmet offers a higher level of protection thanks to the inclusion of the MIPS® Brain Protection System and Conehead technology. Together, these systems offer riders increased protection by reducing the impacts of both rotational and radial forces respectively during a crash. If safety and style is what you look for in a helmet, then look no further.

**Construction:** ABS shell  
**Fit system:** No  
**Features:** Optimized ventilation  
Removable and washable liner & cheek pads  
Easily adjust visor  
**Sizes:** S-XL

## 550 SERIES

The SCOTT 550 Helmet is an innovative, high-end helmet that pushes the limits of ventilation and safety. Equipped with the latest safety features such as MIPS® Brain Protection System and Conehead technology, this helmet offer riders increased protection by reducing the impacts of both rotational and radial forces

respectively during a crash. The 550's class-leading, advanced cooling management system offers riders the best ventilation on the market by utilizing strategically placed vents throughout the helmet to maximize airflow. The result is a comfortable, safe and stylish helmet that helps you get your head in the game.

LENS LOCK SYSTEM

## Prospect Super WFS

Productnr.	Product	€
620-2103-11	WFS white/black clear works	189,00

## Prospect Enduro

The SCOTT Prospect Enduro LS Goggle holds the same great features than the Prospect. Big field of vision, lens lock system, No Sweat face foam, pivoting outriggers and much more. What makes this goggle so special is the light sensitive double lens which adapts automatically to sunlight intensity. With this lens you are for sure equipped for all weather conditions!

620-2011-15	Enduro black/white clear	109,00
620-2011-16	Enduro kaki green clear	109,00

## Prospect WFS rolloff

The SCOTT Prospect WFS Goggle possesses the same great features as the Prospect. It is equipped with a WFS roll-off system for a large field of vision even in the muddiest conditions. The canisters can be clipped directly on the WORKS pins of the lens which makes their installation much easier and less time consuming. It takes almost no effort as there are no tools required. It also makes the switch from roll-off to tear-off simple and fast. The improved, transparent anti-stick grid offers a better field of vision, an easier installation in the canisters, a better sliding on the lens and a better sealing with the lens at the top.

GOGGLES

## Front Line MX

Front Line™ MX is the latest addition to Oakley's High Impact line of goggles. With a Large to medium sized fit, Front Line™ MX is optimized for a wide variety of faces and is engineered to fit perfectly with most helmets. Designed with Oakley's Ridglock Technology, changing lenses is quick and easy while still allowing for a complete lens seal to prevent harsh conditions from penetrating into your goggle. Discreet frame notches at temples provide compatibility with most prescription eyewear.

## O2 MX Race Ready

As an evolution of the legendary O-Frame® goggle, the O2™ family has Oakley DNA pumping through every vein. The Oakley O2™ MX extends the O2™ style and performance to a mid-sized fit, but there is nothing medium about it. The large lens with streamlined frame geometry expands peripheral view in every direction. Delivered with Roll-offs

## Velocity 6.5

### Bulletproof and impact tested to:

- ANSI Z87.1-2015
- Military Ballistic Impact Standard (MIL-DTL-43511D)
- Certified CE EN 1938 :2010
- Out-riggers with a 50mm Anti-Slip coated strap
- WideVision (170°) Anti-Fog lens
- Permanent anti-fog function built into the inner lens polymer
- Self-draining lens/frame design
- Easy clip-in/out lens change
- Dual-density frame for fit, seal and comfort
- Tapered custom shape to fit even those difficult helmets
- OTG – over-the-glasses fit
- Triple-layer, dual-density foam and anti-sweat fleece backing
- Roll-Off ready for our WideVision 48mm system (optional)
- Tear-Off ready with posts. Tear-off pack included
- Removable nose guard
- Soft bag included
- Optional lenses available from 22-83% light transmission (VLT)

## Axis Pro Kneeprotection

The Axis Pro Knee brace features an industry-first aluminum and carbon fiber frame construction. The aluminum hinge design allows for a low profile structure, which results in a comfortable, lightweight and rigid brace.

- Carbon fiber upper and lower cuffs
- Patented Tru-Motion 2.0 anatomically correct hinges
- Dual Defense full coverage knee cup
- Adjustable hyperextension lockouts
- Sharkskin neoprene liners
- Synthetic leather modular straps
- Compression comfort cuff

Productnr	Product	€	Sek	NOK	DKK

## Bionic 10 Carbon KneeProtection

Constructed from an innovative advanced carbon polymer compound for improved strength and performance, the Bionic 10 Carbon Knee Brace helps reduce the risk and severity of injury by preventing excessive hypertension of the knee in an accident. Thanks to innovative engineering the Fluid Tech is ultra-lightweight and offers a highly customizable and secure fit, while affording improved directional movement of the knee articulation while riding.

## Bionic 7 KneeProtection

Incorporating an evolved chassis constructed from an innovative, advanced fiber-glass compound for improved performance, the Bionic 7 Knee Brace is a versatile, fully CE certified knee brace. Designed for the stresses of off-road riding, the Bionic 7 provides support and helps protect from hyper-extension in the event of a crash. Lightweight, ventilated and highly customizable this brace offers a personalized and secure fit.

## Protection jacket 5.5

The hard shell 5.5 Body Protector offers chest, back, elbow, shoulder and flank protection. CE tested and certified, it scores a total of 25 points in the Leatt protection rating system. The maximum level of full-body protection that we offer riders currently, the 5.5 is the ideal piece of safety gear for any rider.

It has a 3D multi-layer, multi-plate articulating design that proves to be comfortable as well as ventilated with 53 ventilation slots. Premium hard shell protection integrated with 3D AirFit soft impact foam, the protector will conform to your body's shape, yet the soft foam will absorb energy when subjected to impact, protecting you during a crash. The hard shell areas are made of high density poly ethylene (HDPE) for high impact or stone deflection. A new feature is that it has a mesh base layer as well as new anti-odor MoistureCool and AirMesh wicking fabrics. It is also compatible with Leatt neck braces.

## SOFT PROTECTION

Our top-of-the-line soft body protection range offers a super lightweight, ventilated and secure strapping system. The perforated, multi-layer, 3DF AirFit impact foam offers a soft and flexible fit, yet instantly absorbs energy upon impact. This combination results in a comfortable fit that conforms to many body shapes and is CE certified to the highest levels on chest and back impact protection

## Neckroll Junior

Designed and developed specifically for younger riders, the Sequence Youth Neck Roll is the starting point on a junior rider's journey to the Bionic Neck Support. Ergonomically profiled for young rider's body requirement the Sequence Neck Roll's frame is designed to transfer energy impact away from the upper neck.

# For juniors!

## Neck support Youth

Specially designed for youth or smaller framed rider the Youth Neck Support functions when the helmet and support frame provide an alternative load path for the excessive energy that compresses the neck. If the helmet is in contact with the neck support at the moment of impact the overall load passing through the neck can be reduced, which may prevent a fracture from occurring and reduce the chance of muscular injuries from extreme head movement. Although it is not possible to eliminate the risk of any form of injury, the support has been proven to help reduce the most serious damage and minimize the risk of collateral injury as the impact load is channeled away from the neck.

## BNS Tech-2

The Bionic Neck Support Tech 2 is constructed from an advanced, high-performance carbon polymer compound and is designed to help prevent injury in a crash situation by dissipating and diverting impact forces away from the neck and spine. The BNS functions when the rider's helmet makes contact with the frame at the moment of a crash, thus providing a clean, solid surface which instantly channels damaging, compressive impact energy away from the neck and on to the BNS. Featuring Alpinestars' exclusive and revolutionary rear stabilizer for progressive force relief (PFR) the BNS Tech 2 is designed for use in motocross and off-road riding and offers a highly personalized and stable fit while incorporating innovative new features such as a new quick release locking system.

## Neckbrace GPX 6.5

At just 600g, the Leatt GPX 6.5 Carbon neck brace is the class leader. The rigid, non-flexible platform made of Carbon matrix can reduce your risk of a serious neck injury by up to 47%.

Designed to fit all riders comfortably, the chassis is fully adjustable whilst the structure remains very rigid during a crash. It has an engineered collarbone cut-out to help keep your helmet and brace away from your most fragile bones during a crash.

All Leatt neck braces are CE tested and certified as Personal Protective Equipment.

## Boots Tech 10

The Tech 10 has set the standard for Motocross boot performance and protection for well over a decade. The completely redesigned Tech 10 boot raises the performance envelope even further. Perfection through innovation; while maintaining the iconic Tech 10 look, the new boot represents an entirely new approach - improving its ability to give a rider the ultimate in feel, comfort and safety.

The Tech 10's re-design has been guided by three priorities as the Alpinestars technical footwear development team looked to improve overall functionality, performance and safety, decrease weight and reduce material volume. Maximizing these priorities is the key achievement of the new Tech 10 and the result is an all new boot with a greater range of movement and flexibility while offering better control over the flexion and torsion forces that significantly improve boot performance, giving the rider greater confidence and protection.

## Atojo SRS

Brand new for 2020 is the Sidi Atojo SR. The Atojo is designed to be light, sleek and give the rider excellent bike control.

The Atojo has a dual ankle hinge, with one hinge above the ankle and one below. It has ankle support bracing inside the boot that is designed to prevent hyperextension of the ankle, instep and Achilles tendon. 3 hyperextension systems are built into the boot including an innovative system made with a replaceable insert on the front of the boot that allows a specific amount of tibia movement and freezes if bending is excessive. Rubber inserts along the suede and plastic inner shin provide grip on the bike. The sole is replaceable via 4 bolts.

### Technical Data

- The ATOJO SR's upper uses proven "TECHNOMICRO" microfiber panels equipped with high impact plastic protection. The tongue and front and rear joints are padded with materials resistant to water and the absorption of sweat, dust and mud.
- The boots toe area outer surface is entirely wrapped in high impact plastic with a grip enhancing surface.
- The Atojo is equipped with a rigid and replaceable nylon insert for metatarsus protection which protects the inside of the boot in case the rider's foot slips off the footpeg.
- On the inner shin, the boot leg is built of protective suede with embossed rubber inserts
- The ATOJO SR uses a 3-buckle closure system.
- A spoiler has been added to the lower buckle to deflect debris away from the buckle.
- The malleolus area is protected by ergonomic padding with memory.

### ATOJO SR hinge systems

- Atojo SR has two flex points: the first hinge is positioned under the ankle, to reduce thickness and make the boot smoother on the inside and more aerodynamic overall. Ankle support bracing inside the boot allows for only a limited range of movement to prevent hyper-extension of the ankle, of the instep and of the back tendon. This technology gives the rider greater security.
- The second joint, above the ankle, working in sync with the lower hinge, improves the flexibility of the boot, making the bending movement fluid without compromising rigidity and lateral protection.
- There are three anti hyperextension systems for the foot. The first is located on the first hinge, the second on the back of the boot (the bootleg leans on the ankle avoiding extra bending backwards), the third is frontal and is made up of an innovative system that, through a screw on replaceable insert, allows a specific tibia flexion range and freezes if bending is excessive.
- A bootleg in PU, connected to the ankle strap through the second hinge, protects the back of the boot and is positioned between the upper and the lining.

### SRS SOLE: SR Dovetail sole

- The SR (Sole Replacement System) interchangeable sole has an innovative design and a revolutionary replacement system. Design and technology are patented by Sidi.
- The central part of the sole is made up of a rubber insert with a new interlocking Dovetail system and 4 screws for easy replacement.
- The sole base is slightly higher than the Crossfire 3 for greater engagement with the upper.
- The tip, with traction grooves, and heel are fixed for race level use. An enduro lug sole is also available.
- The heel area has a fixed insert in soft PU that makes the boot more stable and offers grip against the bike.
