DUELL.
BIKE DIVISION
DAMN GOOD FUN
SINCE 1983

Foreword

We embark on a new season, and here we proudly present our latest catalogue for MX and Street gear! We are sure you will find a lot of great products for both you and your vehicle.

Duell spend much time on finding new trends and products for every new season, we hope you appreciate all the news for 2022.

As we all know we live in a fast-changing world so please use our web Duell.eu for all the latest updates on products and prices.

Best Regards
Team Duell

DO YOU WANT TO HAVE OUR CATALOGUE PRINTED OR DIGITAL IN THE FUTURE?

We have decided to take a step in a more environmentally friendly direction and in the future we want to ensure that our printed catalogues are only sent to those who need them. So far, we have sent the catalogues to everyone automatically, but based on the feedback we received, they are unnecessary for some of our clients and they prefer to use the digital catalogs in our webshop.

I PREFER TO USE A DIGITAL CATALOGUE!

All our catalogues can be conveniently found with a single click from our webshop as a digital version. We recommend using the digital version of the catalogue because the digital catalogue always appears first and it is also always up to date! You can easily download catalogues in our webshop 24/7.

I WANT TO HAVE THE PRINTED CATALOGUE!

In the future, we hope that you will pre-order the catalogue from our webshop. Add the catalog to the shopping cart and place an order.

**FAST AND
EASY TO FIND

AVIATOR 3

Raise the bar

Leave everyone behind. Again. Winning once is not difficult, continuing to do so is.

Aviator 3 raises the bar of the competition and redefines the standards of an offroad helmet. The outer shell, exclusively dedicated to the Primal graphic version is 3K Carbon-made. For all the other graphics emphasis is given to the noble Fiber Composite.

For all the range the shell is available in 4 different sizes, and was designed using the wind tunnel to best engineer both shapes and performances. Great attention was concentrated into aerodynamics, to make the helmet stable also at high speed, and the thermodynamics, to optimise thermoregulation.

Airoh's technological achievement is condensed in this new product, where the second-generation AMS2 (Airoh Multiaction Safety System), AEFR (Airoh Emergency Fast Release) and AMLS (Airoh Magnetic Lining System) systems are combined.

The 6 air vents and the spoilers with integrated extractors give Aviator 3 a comfortable fit also when used in the most extreme conditions, just as the innovative AHS (Airoh Hydration System) integrated in the EPS.

INSIDE THE BOX

Go Pro support	Side Bumper	Extended peak
Short nose cover	Screw and filter set	Top vent covers
Front covers	Badge and key	Helmet bag

MATERIAL: Full Carbon 3K, HPC (High Performance Composite)

WEIGHT: From 1290 g ±50 g (only for Primal graphic)

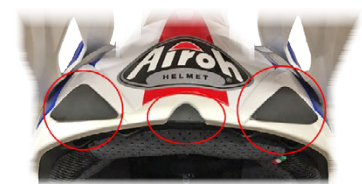

4 shells: 1° XS - S, 2° M, 3° L, 4° XL - XXL

AVAILABLE SIZES: XS (53-54 cm), S (55-56 cm), M (57-58 cm), L (59-60 cm), XL (61-62 cm), XXL (63 cm)

RETENTION SYSTEM: Dd ring

VENTILATION: Front vents, top vents, chin guard vents, rear extractors

INNER LINING: Removable and washable inner lining

Strycker

Strycker

MATERIAL: HPC (High performance composite)

WEIGHT: From 1310 g ±50 g

3 shells: 1° XS - S, 2° M, 3° L-XL-XXL

AVAILABLE SIZES: XS (53-54 cm), S (55-56 cm), M (57-58 cm), L (59-60 cm), XL (61-62 cm), XXL (63 cm)

RETENTION SYSTEM: Dd ring

VENTILATION: Front vents, chin guard vents, rear extractors

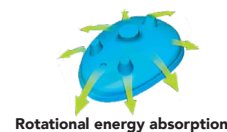

INNER LINING: Removable and washable inner lining

Takes no prisoners the new offroad Airoh helmet. The HPC outer shell comes out in 3 sizes to ensure the best fit possible, emphasized by the anallergic, breathable and fully removable inner-lining equipped with AEFR (Airoh Emergency Fast Release).

Any compromise in terms of safety for Strycker, provided with the revolutionary AMS2 (Airoh Multiaction Safety System), that allows the reduction of the energy amount in case of angular impact.

Highest accuracy in the ventilation, with 5 air vents and 2 rear extractors which perfectly match with a wind-shaped shell.

Twist 2.0

It seemed impossible, but we were able to improve a best seller. Now the Twist 2.0 is more performing and more aggressive while remaining incredibly light. The shell made of HRT (High Resistant Thermoplastic) boasts a good 2 EPS to ensure the best fitting, and now features a rear spoiler that improves the aerodynamics, making Twist 2.0 amazingly stable also at high speeds.

An impressive upgrade is internally concealed and it's named ASN System (Airoh Sliding Net); this technical improvement allows the lining to flow under impact and provides also an outstanding ventilation.

The adjustable peak has an extension, a sophisticated airflow channelling system, a dust filter and DD-Rings retention system to create the perfect mix underlying your success. Rotation technology.

Material: Thermoplastic HRT

Ventilation: Front and chin guard vent, rear spoiler

Retention: Dd ring

Removable and washable inner lining

Sizes: XS 53/54 to XXL 63

Weight: 1220g +/- 50g

TRR-S

A HPC (High Performance Composite) helmet, ultralight and super ventilated. Engineered with 2 shells of different sizes, it offers first-class ventilation with a unique and unmistakable look. Antitheft ring and micrometric buckle make it an easy-to-wear product. It adapts to any journey, passing with ease from asphalt to dirt roads. The top choice for the modern rider.

Material: HPC (High performance composite)

Weight: 850 g ±50 g

2 shells: 1° XS-S-M, 2° L-XL-XXL

Rotational energy absorption

I 50

Off Road Motorcycle helmet HJC i50 available in four youth sizes (S, M, L and XL) this off Road Motorcycle helmet i50 by HJC has a Polycarbonate Composite Shell for Lightweight, superior fit and comfort.

Advanced Polycarbonate shell : Lightweight, Superior fit and comfort using advanced CAD technology.

- Extended eyeport provides maximum visibility and enhanced safety.
- A perfect goggle fit shell design: dual positions for goggle band to provide comfort and perfect goggle fitment.
- Superior ventilation: 9 intakes, 4 exhaust ventilation channels to keep head cool and comfortable. Spacious chin area enables rider to breathe comfortably.

Sliding Layer Impact Distribution (SLID) : SLID reduces rotational acceleration caused by oblique impacts and provides a multi-directional range of motion and additional comfort.

Aerodynamic and Adjustable Peak visor: Reduces lift at high speeds. Adjustable peak visor position for any circumstance. Maximum range adjustable and unbreakable visor.

- (Not ECE Approved)

Alpinestars S-M5

Lightweight outer shell is constructed from a technologically advanced impact resistant thermoplastic in two sizes. Multiple density inner liner. Visor attached to helmet with patented system that will allow easy release in case of a crash. Adjustable top pad height (Alpinestars patented A-head system.) Weight 1260g. Comfort liner sliding on low friction surface attached via two elastic connectors anchored at back and front.

- Side shell couple with soft EPS foam prevents damage to collarbone in the event of a crash.
- Emergency release system and removable cheek pads permit the safe and easy removal of the cheek pads while the helmet is still on, while the 3D contoured foam ensures rider comfort..
- Hydration tube channels are integrated into the helmet's cheek pads for convenience and performance.
- Soft textile chin strap is 26mm and is wider than certification requirements for optimal safety and rider comfort.
- Stainless steel D-rings to ensure a tight and secure fit.
- Weight on Medium 1260g

Meteor Helmet

The word “affordable” just got a new meaning when launching this helmet. AMOQ Meteor is an extremely versatile and comfortable helmet which works great for both motocross and snowmobile riding. The nice-looking shell made of thermoplastic contributes to a low weight, but without compromising anything of the safety features. The inside is detachable and can be easily washed in a washing machine. We are truly convinced that AMOQ Meteor won't make you disappointed!

- Weight: 1260g +/- 50g
- Weight: 1180g +/- 50g **JUNIOR**
- Really good ventilation
- Buckle: Double D-rings
- Detachable and washable inside
- Approved according to ECE 22.05
- Shell made of thermoplastic (ABS)

Vertigo MIPS Helmet

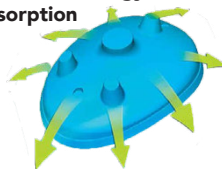

Do you want to take your riding to the next level? Then it will involve a lot of risks where you need a helmet with that “little extra” when it comes to safety. AMOQ Vertigo is developed in a close collaboration with the company MIPS, which is the world-leader in Brain Protection Systems for helmets, which minimizes the risk of concussions. In addition to the fantastic MIPS system, this helmet has a very comfortable premium interior, which works great as for both motocross and snowmobiling. The shell has an aerodynamic shape and is adapted for your goggles to be in place no matter how hard you ride. The interior is of course removable and can be easily washed in the washing machine. The ventilation is large enough at the back so that the heat is effectively ventilated out, but without making the helmet too cold during the winter. The unique price-quality ratio what you won't find anywhere else. Get ready for the adventure of your life – safely!

- High security
- Weight: 1380g +/- 50g
- Buckle: Double D-rings
- World-class ventilation
- Shell of thermoplastic (ABS)
- MIPS® Brain Protection System
- Approved according to ECE 22.05
- Removable and washable interior

MOTO 3.5 Helmet JUNIOR

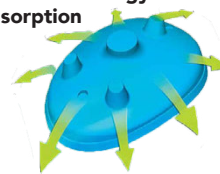

- Injected Polymer Compound shell in three sizes
- Multi-density impact foam for reduction of forces to head and brain

For juniors!

360° Turbine Technology

- Reduced peak brain acceleration by up to 30% at impact speeds associated with concussion
- Reduces peak brain rotational acceleration by up to 40%
- Visor has breakaway function to reduce forces to head and neck in a crash
- Inner liner is washable, breathable and has moisture wicking anti-odor fabric
- Designed to offer great neck brace mobility
- Emergency cheek pad removal
- Certified and tested: DOT+ECE 22.05 or JIS T 8133:2015
- Weight: DOT+ECE from 1.270 ± 50g (2.80lbs)
- Size M 51-52cm
- Size L 53-54cm

Rotational energy absorption

1000 Headlamp

- Light source & Luminous flux 2 Cree XP-L2 leds 1000 lumens(max)
- Working modes 100%-70%-40%-10%
- Shell material Aluminum alloy
- Mount place Headstrap
- Power source 2*18650 Samsung brand battery pack(7.2V 3.5Ah)
- Battery pack Waterproof rubber coated casing
- Charging time 2-3h(Automatic charger switch off when fully charged.)
- Working time 2.2h+ at 100% mode 100h+ at low mode
- Dustproof and waterproof level IP67
- Protections Under voltage, over voltage ,over current protection
- Over heat protection
- Light will turn to a lower lighting mode to protect electronics
- Size 54mm *39mm*27mm (L*W*H)
- Weight 80g
- Approval CE/UL approval

Packing:

- Light head, 2cells waterproof battery pack, charger, headstrap, manual

8500 Helmetlight

Product Features:

- Multi-light source high power headlight. Max 8500 lumens output.
- 4*SST70 Led. Color temp 5500k-6500K.
- Multi-angle lens design, wider illumination range.
- One-piece metal shell CNC hollow design, using integrated heatsink welding process to ensure rapid heat dissipation.
- GoPro-standard mount in alloy.
- A variety of lighting modes to fit more conditions, 10%-40%-70%-
- 100%.
- Independent switch control unit.
- 108Wh Large capacity battery pack for long running time.

OAKLEY®

GOGGLES

Front Line MX

Front Line™ MX is the latest addition to Oakley's High Impact line of goggles. With a Large to medium sized fit, Front Line™ MX is optimized for a wide variety of faces and is engineered to fit perfectly with most helmets. Designed with Oakley's Ridglock Technology, changing lenses is quick and easy while still allowing for a

complete lens seal to prevent harsh conditions from penetrating into your goggle. Discreet frame notches at temples provide compatibility with most prescription eyewear.

O-Frame MX

Some of the winningest riders in history put their faith in the Oakley O-Frame®, relying on the moisture-wicking comfort, wide view and impact-resistant lens.

- Flexible O Matter frame optimized for comfort, fit and maximized peripheral view
- Impact-resistant lens material provides 1% protection against UVA / UVB / UVC & harmful blue light up to 4nm
- Scratch-resistant lens with F2 Anti-fog coating
- Glare reduction and tuned light transmission of Iridium® lens coating (optional)
- Triple-layer face foam fleece to wick away sweat
- Adjustable 4mm strap with silicone lining for a more secure fit
- Engineered to fit securely with most helmets without compromising fit
- Configurable with Race Ready roll-off accessory
- Includes microbag for storage and lens cleaning
- All iridium SKUs include extra clear lens (except for special collection SKUs)
- Meets impact requirements based on ANSI Z87.1 and END 1938 standards

AMOQ COMET SHADES

AMOQ Comet Shades are the sunglasses that allows you to reach your full potential as a snowmobile rider. These sunglasses ensure that you are the coolest on the mountain AND in the bar at the end of the day. The polarized lens effectively blocks strong glare and surface reflections, which protects your eyes when the sun is shining the most. The cocky look in the design makes you appear as an even more skilled snowmobile rider than you really are, which results in more respect within the group of friends and a better self-confidence in most contexts. The fact that the price is also completely right makes a purchase of these a "no-brainer", in our opinion!

- Polarized lens
- Adjustable temples
- Microfiber storage bag included
- Antiscratch & antifog treated lens
- 100% protection against UV light (UV400)

Vision Magnetic

Take your riding to the next level with the frameless AMOQ Vision goggles. The Vision goggles comes with flexible and comfortable frame together with a magnetic lens technology as standard. This allows you to quickly change your lens when you are out riding and the weather changes. The Vision goggles also features a triple density foam where the inner layer is shock absorbing and the outer is moisture-wicking. A highly competitive goggle that have passed rough testing on several different motocross tracks around Scandinavia with the highest degree!

- Flexible frame
- Triple density foam
- 100% UV-protection
- Silicone treated strap
- Magnetic lens technology
- Anti-scratch & anti-fog treated lens

Primal

The SCOTT Primal Goggle is the latest addition to the SCOTT off-road goggle range. With its perfect blend of simplicity and style, this goggle is ideal for newcomers and experienced riders on a budget. With features such as 2-layer face foam, a chrome SCOTT TruView single WORKS lens and NoFog™ Anti-Fog lens treatment, the Primal follows in the footsteps of its big brothers, the Prospect and the Fury. Optimized for smaller faces, the Primal packs a real punch and is available at an unbeatable price.

Prospect WFS rolloff

The SCOTT Prospect WFS Goggle possesses the same great features as the Prospect. It is equipped with a WFS roll-off system for a large field of vision even in the muddiest conditions. The canisters can be clipped directly on the WORKS pins of the lens which makes their installation much easier and less time consuming. It takes almost no effort as there are no tools required. It also makes the switch from roll-off to tear-off simple and fast. The improved, transparent anti-stick grid offers a better field of vision, an easier installation in the canisters, a better sliding on the lens and a better sealing with the lens at the top.

Gogglebag included

Prospect Super WFS

The SCOTT Prospect Super WFS is the ultimate motocross racing goggle. It possesses the same great features as the Prospect WFS, but the Super WFS version features a double WORKS lens with the unique addition of premium anti-stick dots for hyper-smooth sliding action and an upgraded mudflap with sealing tape for maximum performance. It comes equipped with a WFS50 roll-off system for a large and clear field of vision when the mud starts spraying. The canisters can be clipped directly on the WORKS lens pins for quick and easy installation, with no tools required. Tear-offs can then be easily installed on the same pins for extra vision protection.

Prospect Enduro

The SCOTT Prospect Enduro Goggle is designed specifically for the modern enduro rider. Boasting the same great features as the Prospect, it also comes with a double lens with Air Control System that prevents fogging and gives the enduro rider extra-clear vision in low-speed situations. In addition, it features an innovative SCOTT Lens Lock System and NoSweat face foam. To avoid slipping of the goggle, it is equipped with an extra-wide, no-slip silicone strap. This strap, together with the articulated outriggers, highly contribute to the improved helmet integration.

Fury MX

A new highlight among the 2020 collection, the SCOTT Fury Goggle is guaranteed to shake things up. Shaped by innovation, technology and design, the Fury follows in the steps of our flagship goggle, the Prospect. Featuring our proven SCOTT Lens Lock System, 3-layer face foam, no-slip silicone strap, and supporting all of the same accessories as the Prospect, this goggle was developed to Defend Your Vision.

Fury WFS

The Fury WFS comes equipped with all the same great features as the standard Fury. This upgraded version comes with a pre-installed WFS50 roll-off system, offering a large, clear field of vision even in the muddiest conditions. The canisters can be clipped directly on the WORKS pins of the lens, which makes their installation much easier and less time-consuming. It takes almost no effort as there are no tools required. It also makes the switch from roll-off to tear-off simple and fast. The improved, transparent anti-stick grid offers a better field of vision, easier installation in the canisters, better sliding on the lens and better sealing with the lens at the top.

Velocity 6.5

Bulletproof and impact tested to:

- ANSI Z87.1-2015
- Military Ballistic Impact Standard (MIL-DTL-43511D)
- Certified CE EN 1938 :2010
- Out-riggers with a 50mm Anti-Slip coated strap
- WideVision (170°) Anti-Fog lens
- Permanent anti-fog function built into the inner lens polymer
- Self-draining lens/frame design
- Easy clip-in/out lens change
- Dual-density frame for fit, seal and comfort
- Tapered custom shape to fit even those difficult helmets
- OTG – over-the-glasses fit
- Triple-layer, dual-density foam and anti-sweat fleece backing
- Roll-Off ready for our WideVision 48mm system (optional)
- Tear-Off ready with posts. Tear-off pack included
- Removable nose guard
- Soft bag included
- Optional lenses available from 22-83% light transmission (VLT)

Velocity 5.5

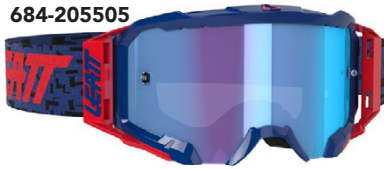

- Bulletproof and impact tested to:
- ANSI Z87.1-2015

Spect Red Bull Strive MX Goggles

Discover the Red Bull SPECT Strive

The next step in high-performance lenses for MX goggles. The double lenses are directly connected to each other and thus offer a unique panoramic view by dispensing with the foam normally used.

PROTECTIONS

New!

Vertical Knee Protection

AMOQ Vertical is a pair of nice and comfortable knee protectors which works great for all types of extreme sports activities. The protectors are CE certified and are made of a durable HDPE material, which is well known for its lightweight capabilities. The anatomically correct design follows the natural motion of the knee and prevents hyperextension.

- Sold in pairs
- Elastic holding straps
- Large ventilation ports
- Moisture wicking lining
- Made of high-density Polyethylene (HDPE)

Bionic 10 Carbon Knee Protection

Constructed from an innovative advanced carbon polymer compound for improved strength and performance, the Bionic 10 Carbon Knee Brace helps reduce the risk and severity of injury by preventing excessive hypertension of the knee in an accident. Thanks to innovative engineering the Fluid Tech is ultra-lightweight and offers a highly customizable and secure fit, while affording improved directional movement of the knee articulation while riding.

Bionic 7 Knee Protection

Incorporating an evolved chassis constructed from an innovative, advanced fiber-glass compound for improved performance, the Bionic 7 Knee Brace is a versatile, fully CE certified knee brace. Designed for the stresses of off-road riding, the Bionic 7 provides support and helps protect from hyper-extension in the event of a crash. Lightweight, ventilated and highly customizable this brace offers a personalized and secure fit.

Kneeprotection SX-1 v2

The SX-1 V2 Knee Protector helps reduce the risk and severity of a knee injury by preventing hypertension of the knee in the event of an accident. This lightweight yet strong protector features a poly-centric hinge system that allows natural articulation of the knee. The ergonomically sculptured knee protector is constructed from a semi-rigid high performance polymer for optimum levels of protection and flexibility, while the highly ventilated padding allows for superb airflow cooling. Correct positioning of the knee protector improves comfort, avoiding pressure points on the patella, and the Dual Strap System promotes a secure fitment of the protector in all riding positions and includes a combined buckle and hook and loop closure for rapid and easy mounting.

Kneeprotection 3DF 5.0 ZIP

Yes, we did hear you. Here it is – our zipper 3DF impact foam knee pads! Based on our award-winning 3DF 5.0 pad, we’ve redesigned the chassis to incorporate a zipper that allows you to take it off and put it on easily. It was not an easy task! The risk of going wrong is there. As a rider told us: “the zipper needs to last forever.” So, we tested that and the sample we made would never fail, but you could not bend your knee.

- Chest and back protector plastic shells are constructed from a high-performance polymeric material blend for optimized flexibility and excellent weight saving properties
- Plastic shells feature extensive, strategically positioned perforation zones for excellent breathability and ventilation.
- Thermoformed padded chassis and padded side wings offer optimal rider comfort.
- Adjustable quick release waist system allows for a customized fit and ensures protection remains secure and close to the body at all times.
- The flexible front side wings are connected to the main chest protector with three bridge fixings allowing the wings to move independently and adapt to the natural contours of the body.
- Shoulder Protectors: EN 1621-1:2012 - Level 1

- Back Protector: EN 1621-2:2014 - Level 2.
- Chest Protector: EN 1621-3:2018 Level 2.
- Removable back puck for BNS compatibility.
- Silicon BNS pull tab for convenient and safe engagement of the BNS.
- The removable shoulder protectors allow this upper body protector to be worn in various configurations, giving the rider the opportunity to tailor the protector to the conditions.
- The removable shoulder protectors feature an adjustable V-Strap System to allow for a comfortable and snug upper arm fitment.

Vestprotector Fusion 2.0 Junior

The Fusion 2.0 Junior was designed specifically for young riders who are looking for all-in-one body protection. CE tested and certified as Personal Protective Equipment and impact protection, it protects your chest, back, shoulders and flank regions. For added protection, it has a built-in neck brace structure made of fiberglass reinforced polyamide resin that is engineered to snap off in an emergency. It also has a collarbone cut-out that assists in protecting your fragile bones.

Protection jacket 5.5

The hard shell 5.5 Body Protector offers chest, back, elbow, shoulder and flank protection. CE tested and certified, it scores a total of 25 points in the Leatt protection rating system. The maximum level of full-body protection that we offer riders currently, the 5.5 is the ideal piece of safety gear for any rider.

It has a 3D multi-layer, multi-plate articulating design that proves to be comfortable as well as ventilated with 53 ventilation slots. Premium hard shell protection integrated with 3D AirFit soft impact foam, the protector will conform to your body's shape, yet the soft foam will absorb energy when subjected to impact, protecting you during a crash. The hard shell areas are made of made of high density poly ethylene (HDPE) for high impact or stone deflection. A new feature is that it has a mesh base layer as well as new anti-odor MoistureCool and AirMesh wicking fabrics. It is also compatible with Leatt neck braces.

F1 Roost Deflector

The F1's lightweight, form fitting design provides optimal protection, functionality and comfort Designed to be worn above or under the jersey.

Impact Shield - An exterior of high-impact tested polymer provides optimum protection against debris and collisions.

Flow Vents - The grid style air vents provide additional air circulation to help regulate your core temperature.

Race Collar Compatible - This product is strategically designed to fit all EVS race collars and most neck braces. Integrated loop straps ensures any EVS race collar stays in place during use.

Modularity - A modular design allows for different configurations depending on the user's preferences.

- Click-Tec front closure system ensures adjustability and secure fit
- Push bio-foam liner

Neckroll Junior

Designed and developed specifically for younger riders, the Sequence Youth Neck Roll is the starting point on a junior rider's journey to the Bionic Neck Support. Ergonomically profiled for young rider's body requirement the Sequence Neck Roll's frame is designed to transfer energy impact away from the upper neck.

Productnr.	S-M	L-XL	Color	€	Sek	NOK	DKK
696-6741018-13	1	3	Black	52,00	525,00	525,00	394,00

Neck support Youth

Specially designed for youth or smaller framed rider the Youth Neck Support functions when the helmet and support frame provide an alternative load path for the excessive energy that compresses the neck. If the helmet is in contact with the neck support at the moment of impact the overall load passing through the neck can be reduced, which may prevent a fracture from occurring and reduce the chance of muscular injuries from extreme head movement. Although it is not possible to eliminate the risk of any form of injury, the support has been proven to help reduce the most serious damage and minimize the risk of collateral injury as the impact load is channeled away from the neck.

BNS Tech-2

The Bionic Neck Support Tech 2 is constructed from an advanced, high-performance carbon polymer compound and is designed to help prevent injury in a crash situation by dissipating and diverting impact forces away from the neck and spine. The BNS functions when the rider's helmet makes contact with the frame at the moment of a crash, thus providing a clean, solid surface which instantly channels damaging, compressive impact energy away from the neck and on to the BNS. Featuring Alpinestars' exclusive and revolutionary rear stabilizer for progressive force relief (PFR) the BNS Tech 2 is designed for use in motocross and off-road riding and offers a highly personalized and stable fit while incorporating innovative new features such as a new quick release locking system.

6.5 Neck brace Carbon **New!**

- Independently lab and rider tested, proven to reduce neck forces and neck injuries through transferring the load during an accident away from the fragile bones in the neck.
- *Up to 89% reduction in critical cervical spine injuries
- *Collarbone injuries up to 45% MORE likely WITHOUT a neck brace
- Engineered collarbone cut-out to keep your helmet rim away from your most fragile bones
- Carbon matrix platform allows for the most efficient reduction in neck forces
- Optimal helmet rim striking platform is designed to redistribute neck forces and provides the helmet with freedom of movement
- CoreFlex split rear folding thoracic strut is designed to work with the body's natural movements for a more comfortable fit and break away before applying excessive pressure to the back
- Sliding front and rear SureFit adjusters offer Three-way adjustability for that perfect fit
- Sculptured, split front for improved comfort and fit
- Low profile push-button open/closure system
- Easy-to-use emergency release mechanism
- Injected, durable and easy-to-clean foam padding
- CE tested and certified as Personal Protective Equipment 89/686/EEC
- Weight: from 600g (1.32lbs)

New!

YOUTH Racer Tactical Pants

The Racer Pants offer optimized levels of comfort and performance in the riding position, thanks to their lightweight chassis, lower waist stretch panels and pre-curved leg design. Developed and tested on some of the toughest terrains around the globe, the sport fit Racer Pants are ideal for many forms of off-road riding. Advanced highly-resistant 600D poly-fabric main chassis construction is PU coated for strength with a technical yarn for durability. Micro rip-stop stretch fabric panels on crotch, knees and rear waist for enhanced rider comfort. 3D pattern, pre-curved ergonomic construction for additional rider comfort and superior freedom of movement.

- Large rear stretch panel insert provides increased comfort and flexibility to the waist and lower back.
- Extensive lightweight and ventilated mesh with stretch panel inserts for an optimized fit.
- Mesh lining for superior comfort.
- Leather reinforced inner-leg panels for enhanced heat resistance, grip and comfort.
- Ratchet closure with waist adjustment straps for a secure, personalized fit.
- Gripper internal waist elastic band helps keep garment in position.
- Convenient interior hip pocket for key/coin storage.

Ascent COMP Jersey

Comp is a well-proven and extremely functional MX jersey from AMOO. It's made of a polyester material with moisture wicking ability, which helps you keep a comfortable temperature even during the hottest days on the motocross track. The arm cuffs have a great fit, but without being too tight which can create arm pump or cramp. The back of the shirt is slightly longer than the front to keep the shirt tucked in from start to finish. The Comp jersey is simply made for winners, or future ones.

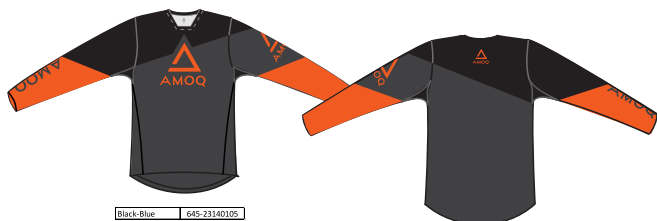

- Comfortable V-shaped collar
- Practical and long back piece
- Made of moisture-wicking polyester
- Built by a multi-panel construction
- Back section with space for own name and number

Ascent Pants

AMOQ Ascent is a pair of solid but at the same time flexible MX pants. These pants are hardly tested on some of northern Europe's toughest motocross tracks with great results. The trousers are made of a durable polyester fabric but have also been equipped with some strategically placed stretch panels in areas where mobility needs to be prioritized. On the inside of the knees, they have been fitted with leather panels, which can withstand the heat from the engine and the wear from the frame/plastic. The result is a pair of solid MX pants where the flexibility has been maintained. Try it yourself, you will not be disappointed.

- Pre-curved knees
- Solid construction
- Adjustable waist buckle
- Perfectly placed stretch panels
- Internal mesh fabric that transports away sweat

Boots Tech 10

Built into the Tech 10's unique and lightweight single-piece co-injected foot chassis is the patented Dynamic Heel Compression Protector (DHCP), an innovative safety feature which includes a fully integrated collapsible heel area with expanded poly-foam to absorb high impact energies during a crash. DHCP features a directional impact protection system which significantly reduces the effect of excessive, potentially injury-causing energy being transferred to the ankle and lower leg. DHCP has been developed and tested in the demanding circuits of professional Supercross and Motocross.

Performance double pivot motion control system features:

- Medial and lateral double pivot system for improved levels of flexibility and precision control.
- Engineered front flexion control offered by a dual front blade system plus shock absorber insert to offer mechanical progressive force release which dampens and absorbs impact energies.
- Redesigned dual density TPU rear blade system engineered to prevent hyperextension while offering improved flex control and impact resistance.

Boots Tech 7

Lightweight upper combines suede leather with lightweight microfiber for impact and abrasion resistant TPU shell. Innovative, evolutionary TPU shin-plate construction for greater range of fitment features a reinforced hook and loop closure for comfortable, highly customized closure.

Soft microfiber gaiter helps seal out excessive water and dirt entry. Evolutionary design for lateral flex zone provides front and rear flexion support and helps prevents torsion. Medial-facing panel

constructed from TPU with rubber insert for maximum grip contact with bike and improved heat and abrasion resistance. Contoured TPU calf protector plate offers impact resistance. Extensive TPU protection on toes, foot, heel, ankle, calf and shin with extra hard compounds on the toe-box, heel and achilles tendon. Closure system includes polymer buckles plus aluminium frame with innovative self-aligning, quick release closures for customized secure fitment. All the buckles are replaceable.

Crossfire 3 SRS

Upper/material: Technomicro microfibre
Lined: Lined with cambrelle® and air teflon mesh
Sole: Rubber sole
Technology:

- Replaceable shin plate
- Micro adjustable and replaceable buckle system
- Flex system upper
- Exclusive and patented flex system with hyper extension block
- Fully adjustable calf area
- Wider calf upper (+ 3 cm) - adjustable system between the calf, shin and leg upper which allows to widen the circumference of the boot and accommodate even the wider calves.
- Replaceable metatarsus inserts
- Toe area covered with a plastic reinforcement
- Rigid, shock resistant, anatomically shaped heel cup
- Assembled and replaceable boot leg, it is stitch-free
- Nylon inner sole with removable arch support pad

SMS sole - Supermotard

The thermoplastic front shin plate, with innovative graphic designs, is anatomically shaped and replaceable.

The Crossfire utilizes four micro adjustable buckle closures, with indented memory-regulation straps. The buckles, straps and retaining clips are easily replaceable. The buckles have just one fixing point (by a screw), which allows them to be easily closed making the boot adaptable to the rider's position. You will note that all four buckles

work independently from each other. This system allows the boot to fit all shapes of feet and lower legs independently making each boot that much more comfortable for each individual rider.

The Crossfire 2 maintains the key feature of the Sidi FLEX SYSTEM, with its two articulated joints. The first lower one, on the ankle, improves leg flexation and allows for a more natural and correct position on the foot pegs. All bolt on components of the Crossfire 2 SM are replaceable. The upper pivot, on the bootleg, improves the boots flexibility and the adjustment of the bootleg itself. In this way, the rider can adjust the boot strap at the calf to his personal preference and achieve an improved fit backwards. This technology guarantees the rider's safety interlocking system.

The boot leg has a replaceable inner calf plate, produced in PU and a printed rubber insert, to protect the leg from exhaust heat,

wear and tear. The calf plate features an inner double adjustment, which allows to widen the circumference of the boot and accommodate even wider calves and shin guards. This adjustment was increased for greater performance.

The heel is anatomically shaped and manufactured in PU. Its particular form was designed and implemented to provide more safety to the foot in case of twisting. The new heel guarantees comfort and stability. The boot is equipped with a panel that protects the metatarsus. A rigid replaceable nylon insert has been added to protect the inside of the boot in case the rider's foot slides off the foot peg or the kick-starter. The insert is replaceable by unscrewing the 4 screws. The toe is entirely covered by plastic protection panels with an embossed geometric design for greater grip. A spoiler has been added to protect and deflect stones and other dirt from the first buckle.

The boot leg upper is entirely assembled with screws, thus it is stitch-free and totally replaceable!

655-2203	Black/Black	40-48	549,00	5 495,00

Atojo SRS

The Atojo is designed to be light, sleek and give the rider excellent bike control.

The Atojo has a dual ankle hinge, with one hinge above the ankle and one below. It has ankle support bracing inside the boot that is designed to prevent hyperextension of the ankle, instep and Achilles tendon. 3 hyperextension systems are built into the boot including an innovative system made with a replaceable insert on the front of the boot that allows a specific amount of tibia movement and freezes if bending is excessive. Rubber inserts along the suede and plastic inner shin provide grip on the bike. The sole is replaceable via 4 bolts.

Technical Data

- The ATOJO SR's upper uses proven "TECHNOMICRO" microfiber panels equipped with high impact plastic protection. The tongue and front and rear joints are padded with materials resistant to water and the absorption of sweat, dust and mud.
- The boots toe area outer surface is entirely wrapped in high impact plastic with a grip enhancing surface.
- The Atojo is equipped with a rigid and replaceable nylon insert for metatarsus protection which protects the inside of the boot in case the rider's foot slips off the footpeg.
- On the inner shin, the boot leg is built of protective suede with embossed rubber inserts
- The ATOJO SR uses a 3-buckle closure system.
- A spoiler has been added to the lower buckle to deflect debris away from the buckle.
- The malleolus area is protected by ergonomic padding with memory.

ATOJO SR hinge systems

- Atojo SR has two flex points: the first hinge is positioned under the ankle, to reduce thickness and make the boot smoother on the inside and more aerodynamic overall. Ankle support bracing inside the boot allows for only a limited range of movement to prevent hyper-extension of the ankle, of the instep and of the back tendon. This technology gives the rider greater security.
- The second joint, above the ankle, working in sync with the lower hinge, improves the flexibility of the boot, making the bending movement fluid without compromising rigidity and lateral protection.

- There are three anti hyperextension systems for the foot. The first is located on the first hinge, the second on the back of the boot (the bootleg leans on the ankle avoiding extra bending backwards), the third is frontal and is made up of an innovative system that, through a screw on replaceable insert, allows a specific tibia flexion range and freezes if bending is excessive.
- A bootleg in PU, connected to the ankle strap through the second hinge, protects the back of the boot and is positioned between the upper and the lining.

SRS SOLE: SR Dovetail sole

- The SR (Sole Replacement System) interchangeable sole has an innovative design and a revolutionary replacement system. Design and technology are patented by Sidi.
- The central part of the sole is made up of a rubber insert with a new interlocking Dovetail system and 4 screws for easy replacement.
- The sole base is slightly higher than the Crossfire 3 for greater engagement with the upper.
- The tip, with traction grooves, and heel are fixed for race level use. An enduro lug sole is also available.
- The heel area has a fixed insert in soft PU that makes the boot more stable and offers grip against the bike.
